

LO: To identify angles

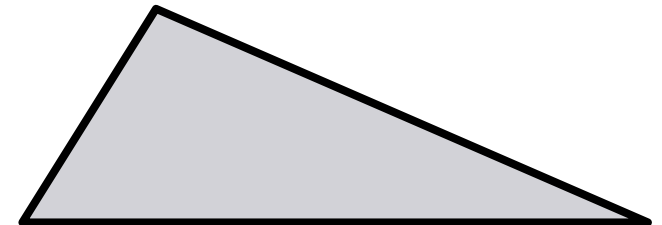

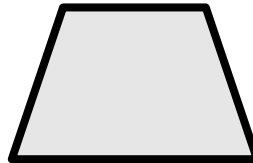

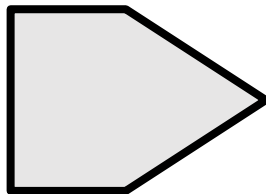

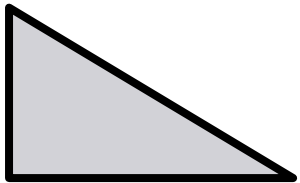

Task One:

Circle ALL of the angles in each shape.

Task Two:

Underneath each shape, write down how many angles it has.

Task Three: In blue, colour the shape that has the least number of angles.

In red, colour the shape with the greatest number of angles.

Challenge: You will notice that all of the shapes above are draw using ONLY straight lines as angles are created when straight lines meet.

You challenge is to write your name, using bubble writing, or draw an animal in straight lines only. Circle all of the angles that you can see. If you do your name, which letters have the most and least angles?
